Water Harvesting Lab Activities in Ethiopia

Giulio Castelli – Elena Bresci

21.02.2018 – 14:30 – Aula Magna della Scuola di Agraria, Piazzale delle Cascine

The seminar will introduce and discuss the most recent research activities of the [Water Harvesting Lab](#) of the Department of Agricultural, Food and Forestry Systems (GESAAF) in Ethiopia, in Cooperation with Mekelle University, including:

- Water Harvesting and flood water management;
- Land-use and hydrology;
- Water management and crop water productivity;
- Socio-economics and stories of change.

Opportunities for MSc Students: the call for 2 study grants for thesis work in Ethiopia will be presented and possible activities will be discussed (MSc in Environmental Engineering; Geoengineering, Agricultural Sciences and Natural Resources Management for tropical Rural Development, University of Florence)
